Webinar+

Every class is available as a free webinar to class participants. This means you can review a class you already attended, or catch up on a session you missed. You can pause a webinar and return to it at any time. Classes remain available as webinars for six months after the class ends, so you can return often to review useful information.

To access a webinar, go to the Williamson Health Care web site, log in with your WHC NET user name and password, click the Webinar link and then select your class.
